

PROPERTY OWNERS

Security Camera Grant Program Application

Grants will be awarded to property owners undertaking the following project: The purchase of a security camera system and mounting of at least one camera outside of their building. The grant requires an agreement to allow the Lower East Side Business Improvement District (LES BID) to review the tapes of such camera in the event of an incident that the LES BID believes may have been captured by the tapes. The video camera system must have a minimum retention time of video of 20 days.

For eligible participants, the Security Camera Grant Program provides a matching grant of 50 percent of your total project cost, up to a maximum of \$425. If property is on a thru lot or corner lot and if a second extra camera is mounted on the side of the building, the property owner will receive a reimbursement of an extra \$250. Grants will be awarded on a reimbursement basis by submitting a dated receipt marked "paid in full," a canceled check and a diagram specifying the locations of the cameras.

No grants will be awarded unless a completed application has been approved. *The grant is available as a one time offer only.*
